-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### **Claim Rejections - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

### **Claim 1: rejected under 35 U.S.C. 112, second paragraph**

Claim is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims are vague and indefinite. For example, in line 10, there is no proper antecedent basis for the term "its edge".

### **Claim Rejections - 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by JP '437 (JP 2001-165437).

Art Unit: 3749

JP '437 shows a lighter housing having a gas container (12), a combustion device (not referenced) the gas container, and an igniter for igniting (not referenced) the combustion device and further including includes an upper cover (1) and a case (2), wherein the upper cover includes a protuberance (3a) forming a small hole (3c) therein. A connector (3b) is disposed below the protuberance of said upper cover for connecting the upper cover and the case. JP '437 shows (not referenced) the connector including a recess portion (i.e. – the space between the upwardly directed hinge leaves) coupling with, via the hinge pin, the protuberance and having transverse holes on both sides of the recess portion. A bolt/pin connects the protuberance and the recess portion. The case has at an upper edge port a longitudinal groove (6) connected to the connector and having an opening (7) at the edge port of the groove to couple with the protuberance of the upper cover.

### **Conclusion**

See the attached PTO FORM 892 for prior art made of record and not relied upon and which are considered pertinent to applicant's disclosure.
